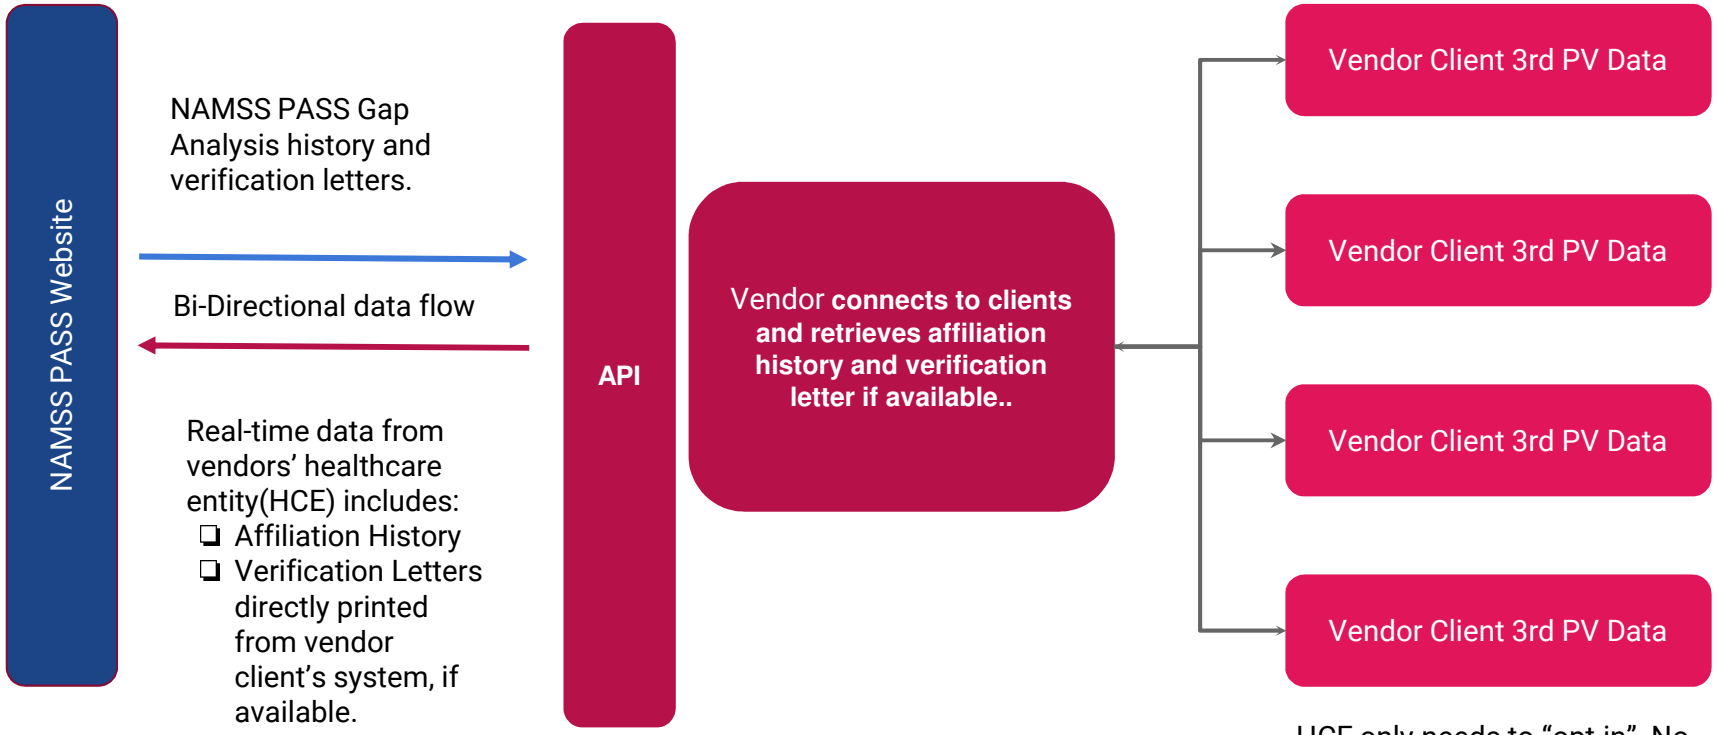
NAMSS PASS Advanced ECP Bi-Directional Real-time Data Exchange



HCE only needs to "opt-in". No need to create and upload Excel files.

Features of New Advanced ECP

Current NAMSS PASS Process	Advanced ECP Process
Manual Export of Affiliation Data from credentialing software to Excel file.	No Exporting required. HCE affiliation data is retrieved directly from HCE credentialing software and displayed real-time and fully integrated in the NAMSS PASS Gap Analysis with current NAMSS PASS data.
Manual Upload of Excel to NAMSS PASS	No Uploading at all. Integration occurs systematically and in the background. No need for any human intervention.
Data is stored on secure NAMSS PASS Data Repository	No data is uploaded so data is not stored in NAMSS PASS Data Repository so concern about HCE data residing on another server is eliminated.
Data uploading and retrieval via website interface.	Data contribution and retrieval and be fully automated, depending on vendor implementation.

Benefits of Advanced ECP

- Simplifies your participation as a Contributing Hospital
- Program is bi-directional data exchange so your affiliation history is systematically available to other NAMSS PASS users through the NAMSS PASS Gap Analysis profile.
- Your credentialing software will have direct electronic access to NAMSS PASS data without the need to login.
- Saves time! Saves money! Enhances Patient Safety!

Next Action Item

Call your software vendor to request they implement the Advanced ECP in their credentialing software. No cost from NAMSS PASS to the vendors.
